Take the Hassle Out of Card Processing

Dealing with the difficulties of credit card processing can be a full-time job. Let us do it for you. **ezdebit** is the first fully-integrated payment processing solution for use with **ezpos**. This web-based software offers the security you need and the ease of use you've come to expect from our software.

With **ezdebit**, you can accept payments much as you might through Verifone's PCCharge or external processing equipment, but without needing to deal with exorbitant third-party support fees. Some of the best rates in the business are available through **ezdebit**. Access and a free merchant account are included with **ezaccess** Platinum service.

Easy to Handle. ezdebit is simple to master. With little training, you'll be ready to ring up sales with your new integrated payment processing solution. As with the rest of our extensive suite of retail products and services, our goal with **ezdebit** is to provide you with an efficient and straightforward solution that lets you focus on what's important: running a successful business.

Easy to Process. ezdebit has seamless integration with **ezpos**. This means that processing your sales transactions has never been easier. Simply follow the prompts and swipe your customer's credit card without leaving **ezpos**. Instead of being stored in a local database, a practice rapidly becoming disfavored in the business world, all credit information is passed through a secure connection directly to your merchant processor.

Easy to Afford. Processing credit card transactions at your store can translate into many small charges that quickly add up and eat away at your profits. Our built-in merchant account provides subscribers with some of the lowest rates available. **ezdebit** also automatically adjusts based on the unique circumstances of each transaction to save you money. Sign up today to start keeping more of your revenue where it belongs—in your registers.

Easy to Manage. ezdebit works to make it easy to manage your store's transactions, either through integration with **ezpos** reports or through a web-based management system that allows you access from anywhere in the world. Not only does this provide convenience, it allows you to rest assured that your customers' information is stored in a manner that is both secure and PCI compliant.

Easy to Activate. As a subscriber to our ezaccess Platinum Support Plan, you are automatically eligible to enable **ezdebit** through **ezpos**. After your store is set up with **ezdebit** and a CashPractice Auto-Debit account, you can instantly begin processing credit card sales. Visit **ezdebit.systemswest.com** to learn more.
